

3 things to do after installing

HVT

HYBRID VINYL TILE

01

Clean HVT with neutral cleaners and apply a cleaner-maintainer that will make your new HVT easier to clean during routine maintenance, re-applying when necessary

02

Use mats (non-rubber) at the entryways and floor protectors under sharp or heavy furniture to keep from scratching or damaging the floor

03

Clean spills with wet microfiber mopping daily or weekly, based on traffic
Less frequently, auto-scrub using the least abrasive pads (red or white)
